

# Notox

- Indicative seal applied with a plier with adjustable pressure on metal wire or cord.
- Environmentally friendly alternative to the traditional lead seal.
- Produced and developed by Peever International in Belgium.
- Available in 9mm diameter in a range of colours. Colour coding possible.
- Temperature resistant at temperatures from -30 ° C to +80 ° C
- A fixed identification can be applied to the seal by means of an inscription on one or both dies of the plier.
- Various applications: utility services, extinguishers, ...
