

The KT range of packaging tape has been developed by TydenBrooks specifically to meet the needs of those responsible for secure transportation of high value goods. KTL can be used on all types of fibreboard, plastic and wood. Any attempt to remove or lift the tape will result in the de-lamination of the top and bottom layer leaving an obvious and clear irreversible security message.

All printing and numbering is under surface making it impossible to remove or alter the tape. Furthermore if the material has been de-laminated, there is no adhesive residue left to allow replacement or resealing of the tape.

To satisfy the increasing demands for an effective security packaging material TydenBrooks is now able to offer customisation in our popular range of self wound tapes.

- Customised security message and top surface design in any language
- Various colours available on larger quantities
- Suitable for use with standard tape dispenser
- Customised tape carries a 216 (36/carton) m.o.q

Current range of KT tamper evident tapes

KTL - Stock Version

Blue top surface material with a clear multilingual "void opened" irreversible void message. The tape is perforated every 152mm (6 inches) but this version of KTL is not numbered. KTL Stock Version is supplied in 50 meter (164 feet) rolls and the tape is 50mm (2 inches) wide.

KTL - Custom Version

Subject to a minimum order quantity of 216 rolls (36 rolls per carton, KTL tape can be customised to your requirements. We can supply customised top surface print and a customised void message along with a colour of your choice. The length and width of the tape can be varied to suit.

KTL+ - Stock Version

Red top surface material with a clear multilingual "void opened" irreversible void message. The tape is perforated every 152mm (6 inches) and each section is uniquely numbered sub surface to prevent tampering with the number. KTL+ Stock Version is supplied in 50 meter (164 feet) rolls and the tape is 50mm (2 inches) wide.

KTL+ - Custom Version

Subject to a minimum order quantity of 216 rolls (36 rolls per carton, KTL+ tape can be customised to your requirements. We can supply customised top surface print and a customised void message along with a colour of your choice. The length and width of the tape can be varied to suit.

KTC - Continuous version of KTL

Customer version only. Subject to a minimum order quantity of 216 rolls (36 rolls per carton, All the benefits of the basic KTL Blue security tape but continuous, without perforation. Preferred reel size, as with all our tapes is 50m long x 50mm wide.

KTW - Subject to a minimum order quantity of 216 rolls (36 rolls per carton, For especially for wood and porous surfaces. Incorporates a double layer of adhesive allowing it to adhere to the contours of the surface to be sealed. Currently only produced to customer requirement though we have sample reels for evaluation.

KTB - High security "Brown" tape

On the surface a standard looking "brown" packing tape though has all the tamper evident characteristics of the KTL/KTC tapes. This is held as a stock item though within reason, can be customised to instruction. Again preferred reel sizes 50m x 50mm wide.

Please contact us to discuss your requirements and we will be happy to produce a design to suit your specification and we will send it to you in PDF format along with the price.
